Author Index—Volume 126 (2001)

Darwiche, A.
Recursive conditioning 5–41
Finkelstein, L. and S. Markovitch
Optimal schedules for monitoring anytime algorithms 63–108
Gomes, C.P. and B. Selman
Algorithm portfolios 43–62
Hansen, E.A. and S. Zilberstein
Monitoring and control of anytime algorithms: A dynamic programming approach 139–157
Horvitz, E.
Principles and applications of continual computation 159–196
Horvitz, E. and S. Zilberstein
Computational tradeoffs under bounded resources 1–4
Markovitch, S., see Finkelstein, L. 63–108
Selman, B., see Gomes, C.P. 43–62
Zhang, W.
Iterative state-space reduction for flexible computation 109–138
Zilberstein, S., see Hansen, E.A. 139–157
Zilberstein, S., see Horvitz, E. 1–4
